Dedicated to Your Success Through:

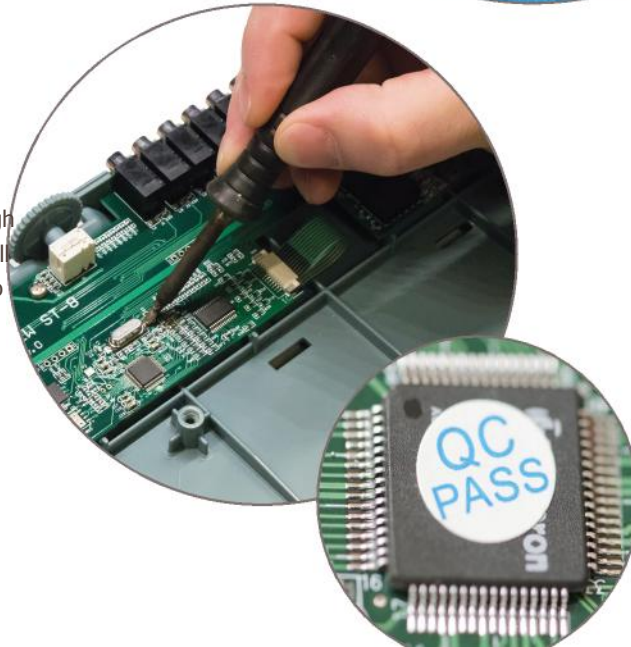

Innovation

In 1985, it all started with a simple Big Red switch for individuals with severe physical disabilities. Shortly after came the BIGmack and a voice for individuals without the ability to speak. We were the first to introduce full, research-based curriculum solutions differentiated for students with mild, moderate, and severe disabilities. We also acquired innovative solutions like BIGtrack, BigKeys, TrackerPro, IntelliKeys, and Classroom Suite to ensure you are able to find everything you need in one place. Today, we continue to innovate by bringing you solutions like Blue2 that enable individuals with disabilities to access consumer technologies and services designed to meet the ever changing solutions for students with disabilities. Innovation is what makes AbleNet a partner you can rely on.

Quality

AbleNet understands the heavy use that our products go through on a daily basis in the classroom. We take pride in building the best high-quality products available today. Each and every product AbleNet manufactures goes through a series of rigorous tests to not only ensure that it meets all of the government mandated safety requirements, but also that it meets the durability requirements of our users. In addition, AbleNet stands behind its quality with a two-year manufacturer warranty.

Support

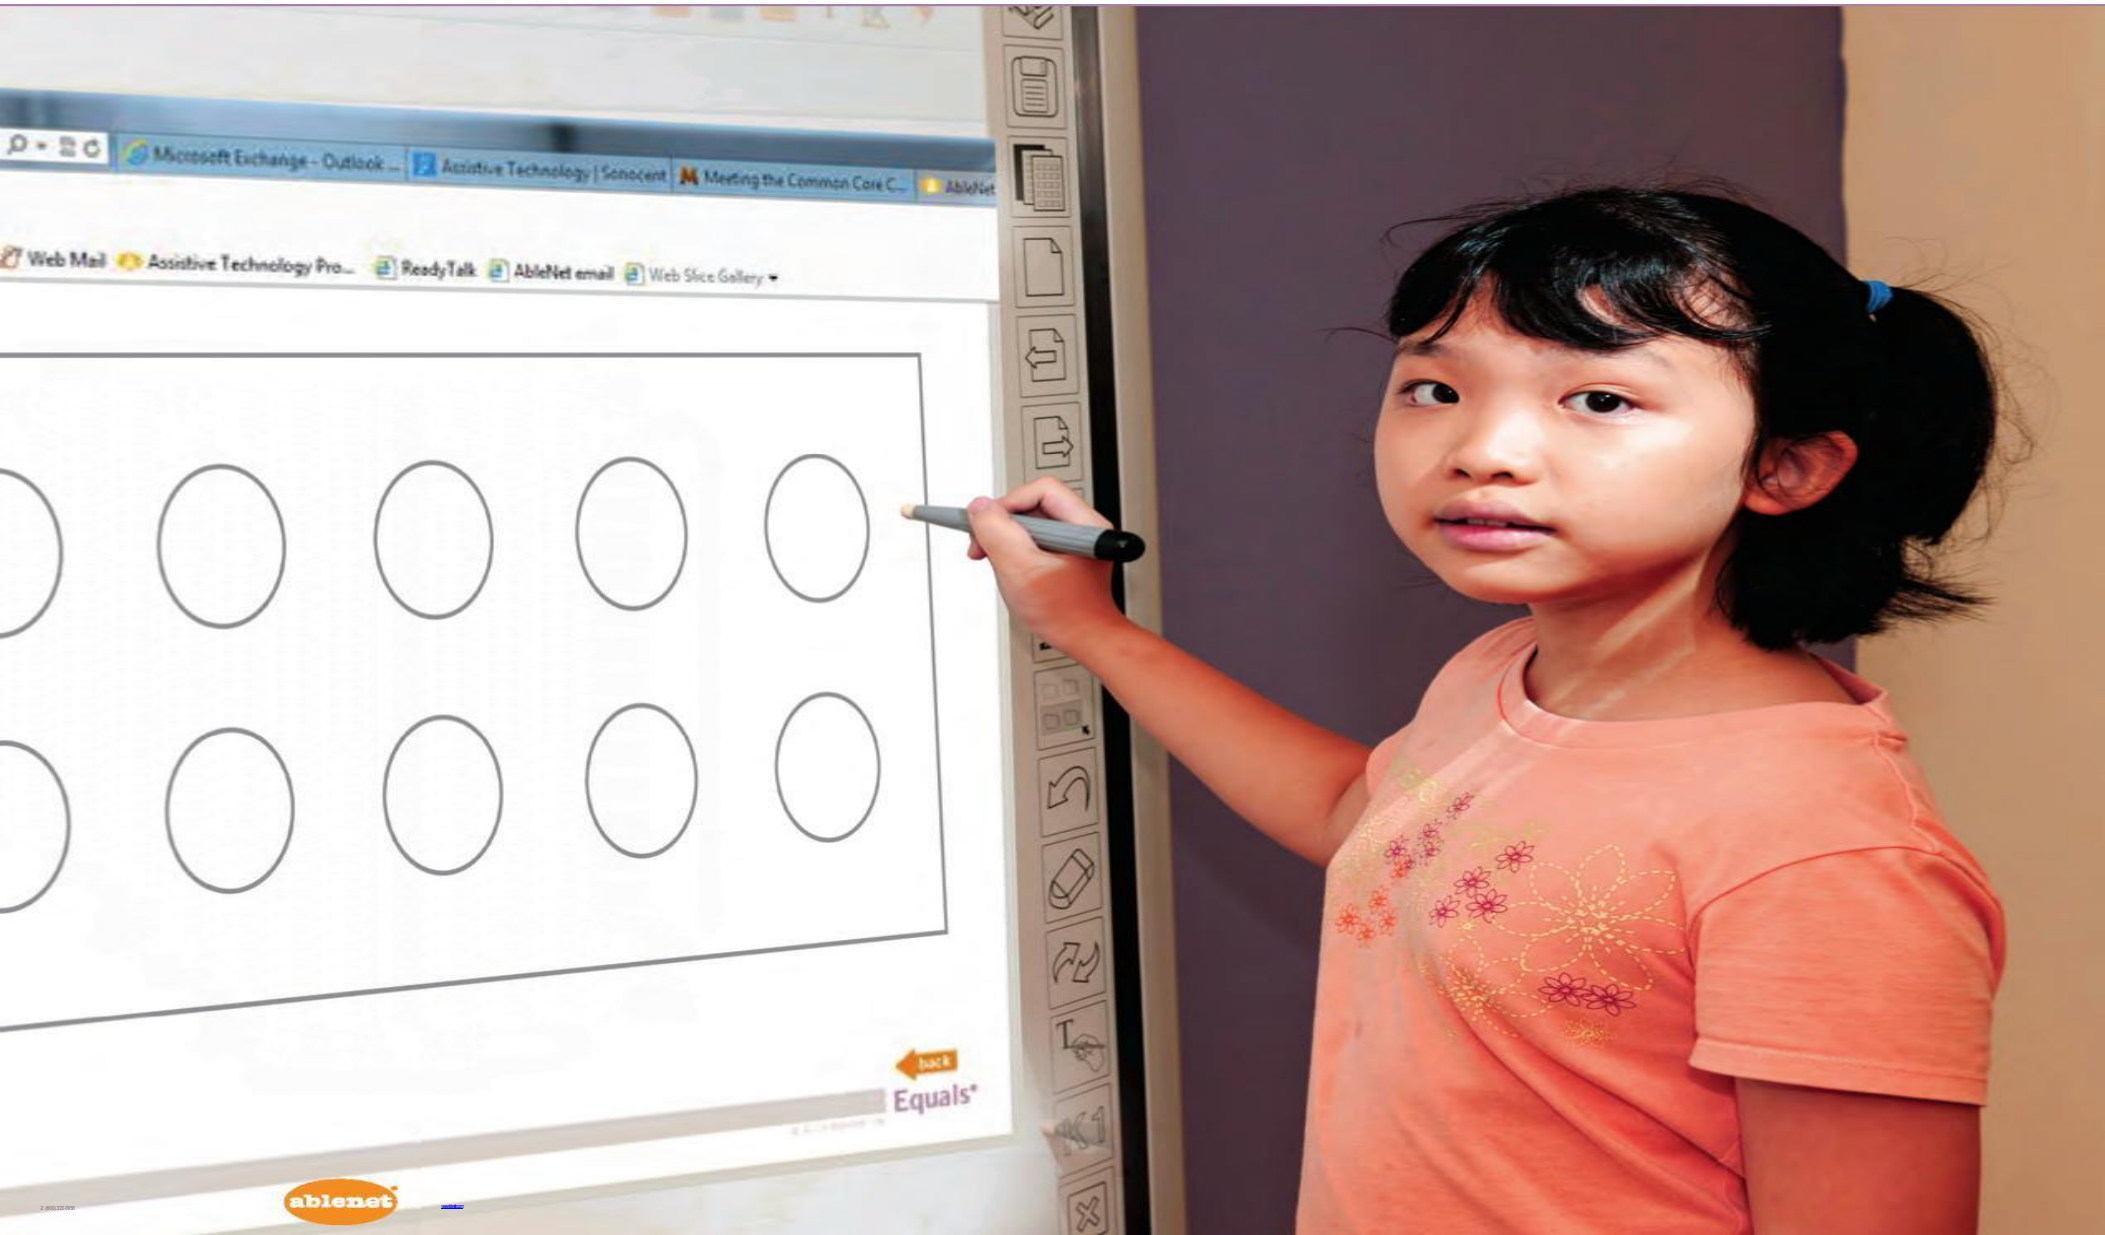

AbleNet has a support team that is ready to help you and your students be successful. Whether support is offered through our highly skilled technical support staff, our curricular training specialists, our funding experts, or from any of our other dedicated staff, you can be assured that the support you and your students need and deserve is available from AbleNet.

Curriculum

Equals Mathematics

Equals[®] Mathematics ** Best Seller **

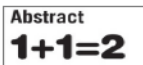

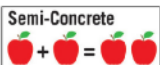

Equals Mathematics is a research-based K-12 age-neutral, multi-year math curriculum with proven results for students with mild, moderate, and severe disabilities.

Research-based

Based on extensive research in math instruction and best practices, cognitive science, action research, and recommendations from highly regarded professional organizations such as National Council of Teachers of Mathematics.

Best Practice Math Instruction

Detailed and systematic instruction with a clear progression of learning in every lesson, utilizing best practice math instructional strategies, including concrete, semi-concrete, and abstract instructional sequence.

Standards

With a comprehensive scope and sequence, Equals Mathematics curriculum aligns to state and alternate standards, Common Core State Standards [CCSS], and Common Core Essential Elements [CCEE] – Kindergarten through 12th grade.

Progress Tracking

Equals Mathematics curriculum includes an initial assessment for placement. Alternative test items with heavy support for learners with non-verbal abilities, motor needs, and/or cognitive challenges ensure all students have the opportunity to show what they know about math. Additionally, progress tracking on every objective is included, with a one-page test for every lesson, differentiated for learners in three levels.

Scope and Sequence

Addresses essential K-4 math skills in age-neutral lessons for students with mild, moderate, and severe disabilities in grades K-12.

Multi-sensory Structure

Students make connections through hands-on, visual, auditory, and other sensory materials and activities in every lesson. An extensive manipulative kit provides multiple tools to solve problems and support understanding.

112% Gains In Math Skills

In an independent three year case study of students with mild, moderate, and severe disabilities, students using Equals Mathematics demonstrated an average of 112% gain in math skills.

Equals® Mathematics

Over 100 manipulatives included!

Level-Based Instruction

Each Equals Mathematics lesson provides flexible, leveled differentiation for students with mild, moderate, and severe disabilities.

Level 1 materials and instructional strategies provide the most support for students with significant language, motor, and/or cognitive challenges so all students can be active math learners.

Example

Counting by tens to 100 using a Step-by-Step communicator to count with peers and practice the pattern.

Level 2 provides strategies and tools for students who need environmental support for opportunities to solve problems independently or with a partner.

Example

Counting by tens to 100 using 10-frame representations of ten.

Level 3 materials provide the least amount of support with a reduction in complex language for low readability demands and with optional challenges.

Example

Students locate the pattern of tens on a hundreds chart and then use the chart to count by tens.

NEW Equals Technology Lesson Center

The Equals Technology Lesson Center (ETLC) is a web-based tool for accessing Equals lesson materials for use with any interactive whiteboard, tablet, desktop, or desktop with projector. The ETLC provides visual materials appropriate for group instruction, problem solving, and demonstration for virtually every Equals lesson.

New Features for 2010

Equals PreK

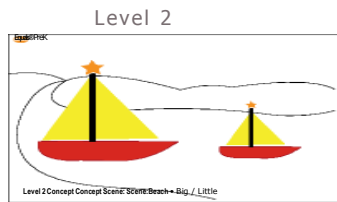

Learning support is provided with more than 100 manipulatives combined with instructional strategies that incorporate level-based instruction for students with disabilities.

Level-based instruction - Example: big and little

Each concept is highlighted and presented separately for support in choosing the big or little boat.

Both concepts are highlighted and presented together, providing support to the student to focus on the choices.

Both concepts are highlighted and presented together with a color background for an extra challenge.

iTalk2™ integrates assistive technology to support different learning needs.

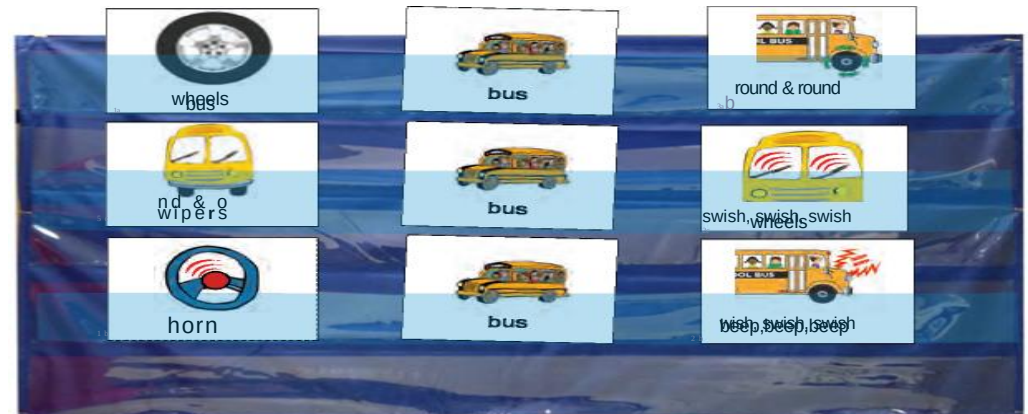

iTalk2™

Manipulatives

Song Cards

Song cards depict well-known songs to teach visual, auditory, and movement patterns.

Equals® PreK Mathematics

Developed for All Young Math Learners

*** New ***

Equals PreK curriculum provides critical, foundational math instruction designed for kindergarten readiness for students of all abilities with the support of built-in differentiation and individualized support.

Foundational Skills

The curriculum incorporates counting, subitizing, cardinality, 1:1 correspondence, color and shape identification, math vocabulary, matching and sorting by attributes to construct sets, basic patterns, and beginning quantitative and positional concepts.

Differentiated Instruction

The differentiated learning approach is provided in three ways: with leveled materials and instruction, a differentiation guide for individual adaptations, and flexible materials to meet learners current abilities for seamless support or challenge opportunities.

Researched-based

Action research conducted over a 1-year period utilized to inform lesson content, student materials, and structure for delivery of instruction.

Assessments

Routines-based and play-based assessment options can be utilized together or alone. Students are observed during their natural daily routines and/or at play centers set-up to allow opportunities for students to show what they know in a play environment.

Manipulatives and Matching Cards

The colorful and engaging manipulative kit draws students to use concrete representations for counting, sorting, matching, making patterns and sets, color and shape identification, and much more. All manipulatives are also pictured on cards and pic-symbols giving pre-schoolers time to build their background knowledge with concrete and semi-concrete models.

Manipulatives

Equals® Pre-Algebra & Pre-Geometry

Equals Pre-Algebra & Pre-Geometry is a stepping stone to understanding higher-order math skills for secondary students with mild, moderate, and severe disabilities.

Stepping Stone from Equals

Beginning where the foundational skills of Equals leave off, Pre-Algebra and Pre-Geometry addresses higher-order math skills for middle and high school students, including algebraic thinking and key geometry terms and concepts. The curriculum includes the use of tables and other workmats to explore operations, scalar thinking, number and geometric relationships, introduction to functions and unknowns, large number comparisons, integers, patterns, ratio and proportion, properties, fractions, and percentages.

Student Assessment

For placement and tracking measurable progress of higher-order math concepts and skills. Alternative test items with heavy support for learners with non-verbal abilities, motor needs, and/or cognitive challenges ensure all students have the opportunity to show what they know.

Best Practice Math Instruction

Detailed and systematic instruction with a clear progression of learning in every lesson, utilizing best practice math instructional strategies, including concrete, semi-concrete, and abstract instructional sequence.

Multi-sensory Structure

A comprehensive manipulative kit provides the necessary tools and support for solving problem and building understanding of more complex mathematics.

Standards

With a comprehensive scope and sequence, the curriculum aligns to state and alternate standards, Common Core State Standards [CCSS], and Common Core Essential Elements [CCEE] – 5th grade through 12th grade.

MEville to WEville - Complete Collection

MEville to WEville® Complete Collection

Best Seller

The MEville to WEville Complete Collection is a K-12 emergent literacy and communication program designed especially for students with significant MEville to WEville Complete Collection Includes: disabilities.

Experiential Approach

Based on research and designed with proven methodologies, MEville to WEville provides the first step in literacy instruction by meaningfully connecting literacy experiences in reading, writing, speaking, and listening with each student's personal connections and preferences. Students learn vocabulary meaning and word recognition, concepts of print skills through interaction with text as good readers do, and by writing and reading their own writing based on their experiences.

Proven Research

Based on research from the National Reading Panel, National Reading Research Council Project and Center for Literacy and Disability Studies.

Data Collection and Literacy Assessments

Easily record and share students' growth and ongoing achievement.

Case Study Findings

A study was conducted in 2010-2011 school year with 87 students with significant disabilities. MEville to WEville curriculum led to gains in vocabulary, concepts of print skills, phonological awareness, and writing. To learn more see

Support Materials

Student materials include printed vocabulary cards, assistive technology devices, six literature books (one set of three for younger and older students), student materials including supports for writing and speaking, games, and activities, and home letters.

Additional Resources

- › Concepts of print lessons
- › Phonemic access lessons (initial letter sounds and rhyming)
- › QuickTalker 7 overlays - one for each lesson
- › Additional literacy strategies
- › Pre-recorded Bookworm module for three elementary and three secondary themed literature books

Extended Curriculum

Extending MEville to WEville includes Don Johnston Start-to-Finish Literacy Starters to continue literacy instruction after MEville to WEville has been completed.

Additional resources include training, student materials, QT7 overlay for every lesson, assessment forms, plus additional lessons and materials for concepts of print, initial letters identification, and rhyming.

Focus on STEM™

Non-fiction Classroom Library

Focus on STEM is a non-fiction classroom library with over 60 unique titles offering students with disabilities the opportunity to learn literacy skills while gaining background knowledge in Science, Technology, Engineering, and Math (STEM). Students apply learned skills with real-life math and science content.

Differentiated Instruction

This supplemental library provides online non-fiction books and activities in math and science adapted at three levels for students with mild, moderate, and severe disabilities.

Systematic Instruction

Students read to learn and make valuable real-world connections with math and science concepts. Non-fiction literacy activities at three levels provide hands-on experience interacting with text as students learn about non-fiction text features, making text connections, identifying main idea and details, sequencing, and much more.

Purchasing Options

Student Assessments

Online assessments to capture student progress on content and vocabulary at three levels of differentiation.

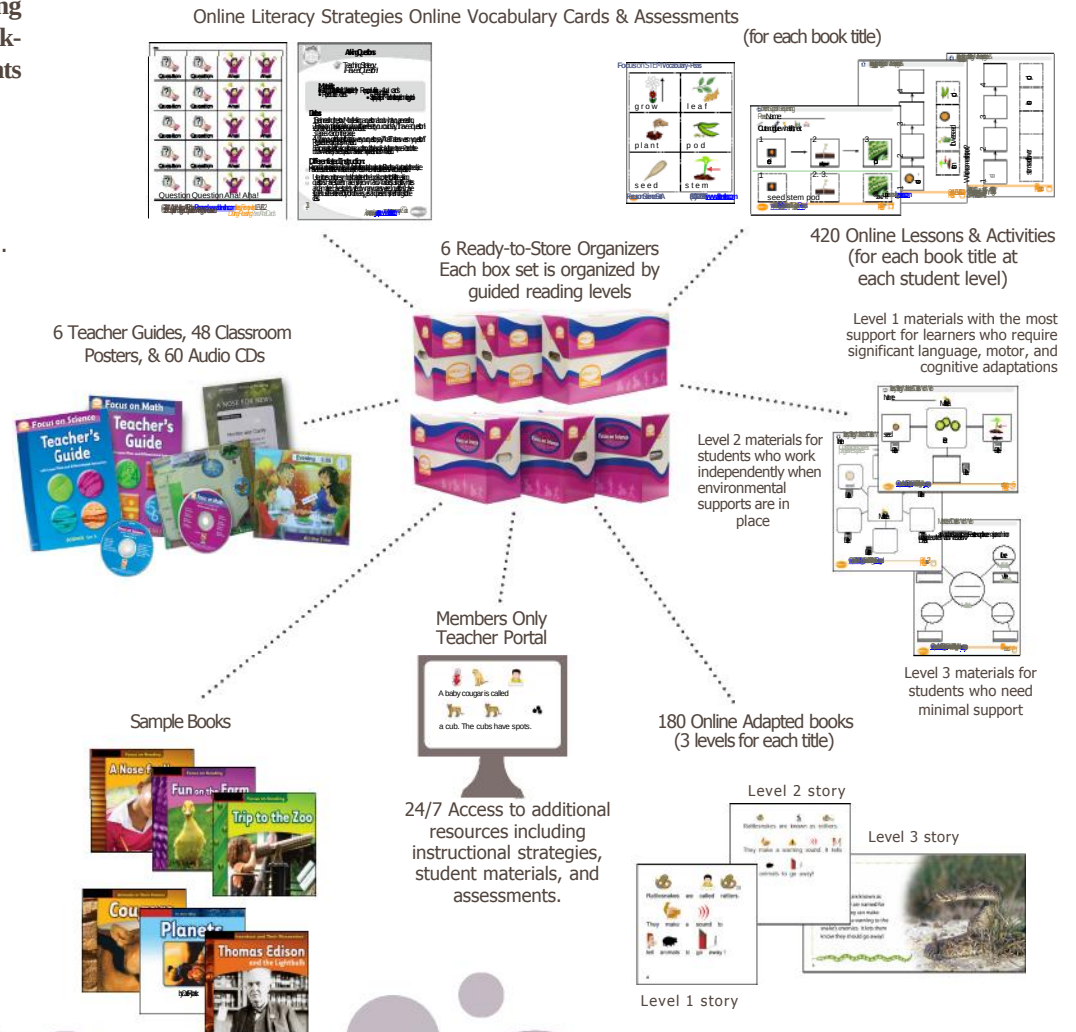

Box Sets Include

Six copies of each student title, audio recordings, posters, teachers guide for additional activities and background information.

Online Adapted Materials

Includes books, vocabulary and comprehension questions, assessments, literacy strategy and non-fiction text feature activities directly related to book content, leveled for students with mild, moderate, and severe disabilities.

Focus on STEM Classroom Library Includes:

Play & Learn™

Pre-School Curriculum

Readiness for Kindergarten begins with a strong pre-school curriculum that introduces new skills and engages students, no matter their ability level. Play & Learn is designed to meet the needs of students of all abilities. The program builds on an evidence-based framework that integrates motor, readiness, and communication skills into lessons that help students explore and learn.

Early Childhood Research

Research-based approach that includes a transdisciplinary model to teach young children motor skill development, along with readiness, social skills, and communication.

Key Elements in a Learning Environment

Provided through movement and music, structure and repetition, motivation and social interaction.

Play & Learn Classroom Program Includes:

- > Pre-school curriculum with more than 120 universally designed lessons
- > ElastaBlast teachers guide & DVD
- > ElastaBlast
- > All-Turn-It Spinner
- > TalkingBrix (3pk)
- > My Art Spinner

Routines-Based Assessments

Children are assessed within their daily routines for more meaningful and accurate data for their age. Functional motor checklists are included.

Theme-Based Activities

Monthly lesson themes based on play areas: Let's Paint and Create, Let's Move, Let's Read and Write, and Let's Play.

Splash®

Extended School Year Program

Splash is an easy-to-implement summer program designed for both elementary and secondary students participating in the extended school year program. The four exciting and engaging topics geared specifically for summer learning are designed to support students of all ages.

Teacher Tool Kit

Includes everything an ESY teacher needs to be successful with instruction. The portfolio package includes pre- and post-assessments, weekly planners, teacher's guide, perforated cards for use with lessons, and themed learning stations.

2015 Student Workbook Topics

- > Be Inventive
- > Let's Be Healthy
- > Start-up!
- > The Night Sky

Splash Classroom Program Includes:

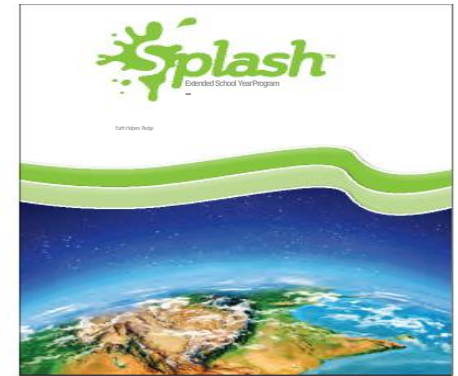

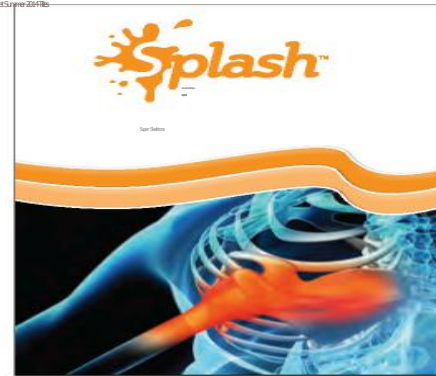

- > Teacher tool kit containing all teacher materials
- > Four weekly planners
- > Special education teachers guide
- > 10 Student workbook kits
- > Over 50 student reproducibles
- > Themed learning stations
- > Pre- and Post-assessments
- > Stickers
- > Members Only Online Teacher Portal
- > On-line activities designed specifically for elementary students and activities for secondary students - ensuring age appropriate learning with a high degree of student engagement

Universally Designed Student Workbooks

Each student workbook focuses on a high-interest topic in a universally designed layout that provides support for all three levels, making it flexible to use in meeting the needs of each student without having to switch books.

Classroom Suite®

Now owned by AbleNet!

In April of 2014, AbleNet purchased a variety of IntelliTools solutions, including Classroom Suite, from Cambium Learning Group, Inc. We are excited to now offer Classroom Suite as an exclusive product from AbleNet and AbleNet resellers.

About Classroom Suite

Classroom Suite is a unique intervention tool that combines direct instruction with a flexible tool environment to help students in grades PreK through 5 achieve mastery in reading, writing and math. Students are provided with explicit instruction, constructive practice, and embedded assessments to allow teachers to gauge progress and individualize instruction for their students. Classroom Suite includes research-based activity templates that can be used "out-of-the-box" or easily customized to meet targeted needs. Lessons can even be sequenced into "intelligent" units to align with district or core curriculum.

Classroom Suite Features

- > Reading instruction aligned with national standards
- > Math instruction targeting number sense and automaticity
- > Writing templates across many genres
- > Creativity tools for whole class instruction and student presentations
- > Early learning activities for emergent learners.

AbleNet Curricular Loan Program - At No Cost!

Find more information about AbleNet's Product Loan Program

Learn First Hand - AbleNet's curriculum can meet the needs of your students with the AbleNet Curricular Loan Program. You can take two weeks to evaluate the AbleNet curriculum of your choice – we'll ship you one complete package of the curricular program so you can thoroughly evaluate the curriculum and all the elements to make the best decision for your students.

Opportunity To Share - By sending you a complete kit for an extended period of time, you'll have the opportunity to share the information with other key staff.

Webinar Support - AbleNet will connect with you during the trial period to determine if scheduling a webinar is needed to review the program and answer any questions you or your staff may have.

The Process - Getting started is very easy. Just call or e-mail customer service. The AbleNet customer service team will work out the details around who you feel should receive the complete program and help to coordinate any additional webinars or conference calls as needed. Once your form on the website is completed, the customer service team will send you a return shipping label so the kit can easily be shipped back to AbleNet at no cost to you.

Full Evaluation - We know curriculum purchases are big investments for schools, and that's why we're proud to provide a product loan program. We're confident that you'll see the value of AbleNet curricular solutions.

IntelliTools

Now owned by AbleNet!

IntelliKeys® USB Keyboard * **Best Seller** *

IntelliKeys is an alternative keyboard designed to meet the needs of students with physical disabilities. It is a customizable, flat, touch-sensitive device. Unlike standard keyboards with a fixed set of keys, the configuration of IntelliKeys can be easily changed by sliding different overlays onto the touch sensitive area. Compatible with Windows XP or newer and Mac OS X 10.1 or newer.

139459 / \$395

IntelliKeys Access Bundle #2

The IntelliKeys Access Bundle #2 includes IntelliKeys USB Keyboard, Classroom Suite 4.5.3, MathTutor, ReadingTutor, Primary Skills Builder, and OverlayMaker® 3.5.

Overlay Maker 3.5 transforms the IntelliKeys Keyboard into a curriculum access device, opening up a world that was previously closed to many students with special physical or cognitive needs. Overlay Maker allows users to create custom overlays in just minutes for individualized needs and greatly expands the capabilities of the basic keyboard. Compatible with Windows XP or newer and Mac OS X 10.1 or newer.

313699 / \$759

Classroom Suite® * **Best Seller** *

Classroom Suite is a unique software intervention tool developed upon the principles of Universal Design for Learning (UDL) that combines two educational paradigms—systematic, explicit instruction and flexible creativity tools. Teachers have control over specific learning objectives, allowing differentiated instruction for individuals or groups to help students in grades PreK-5 achieve mastery in reading, writing, and mathematics. Compatible with Windows XP or newer and Mac OS X 10.1 or newer.

The Four Communication Solutions Every Classroom Must Have

BIGmack® **Best Seller**

Record any single message directly into the BIGmack communicator and press its activation surface for playback up to two-minutes in length. With its large, 5-in/12.7-cm activation surface, BIGmack is an excellent choice for individuals with visual impairments or who require a larger target area. Powered by a replaceable 9-volt battery, BIGmack never needs charging and can last for weeks or even months on a single battery. Includes red, yellow, blue, and green switch tops.

10002100 / \$129

iTalk 2™ **Best Seller**

This dual-message communicator gives individuals the freedom to choose between two activities, food choices, stories, or two of anything else you can imagine. iTalk2 is also great for asking and answering questions, telling jokes and making comments in social situations. With two minutes of recording time, the possibilities are endless. Add a toy or appliance for immediate positive reinforcement and to enhance messages.

10002700 / \$159

LITTLE Step-by-Step™ with Levels **Best Seller**

All the same great features of our BIG and LITTLE Step-by-Step communicators with the power and convenience of levels! Levels are ideal for pre-recording sequential messages to be used at specific times of the day, or for recording and storing sequential messages that are used on a regular basis. With a total of four-minutes of recording time, there is no limit to the number of messages per level. Includes red, yellow, blue, and green switch tops.

10002600 / \$189

SuperTalker™ **Best Seller**

Easy to learn and use, yet powerful enough to be the only voice output device many individuals will ever need. Use it as a single-message communicator for beginners and progress to a two-, four-, or eight-message communicator as the individual's needs and abilities change. No need to learn a new device - instead, simply change the keyguard/symbol holder. SuperTalker also offers eight levels so you can record and store as many as 64-messages!

10002800 / \$359

Single Message Communication Solutions

Single message dedicated speech generating devices (SGDs) are great for users of all abilities and ages. Use with classroom activities so everyone can participate, to teach cause and effect, or to let the teacher know when someone needs assistance. Don't forget, all AbleNet communication solutions are easy to use, durable, and provide high-quality sound output.

Choice Making Communication Solutions

Empower students to answer questions, make decisions on activities, or participate in any other activity that requires a choice to be made.

Sequential Message Communication Solutions

Simply activate and your first recorded message plays. Once finished, activate again to play the next message. Perfect for telling stories, having a conversation, or completing activities with multiple steps.

Multi-Message Communication Solutions

For more advanced users of augmentative and alternative communication (AAC), being able to take their device on-the-go and have multiple communication options is a necessity. With multiple options, AbleNet can meet the needs of a variety of users, regardless of age or ability.

The Four Switches Every Classroom Must Have

Specs® Switch **Best Seller**

With a 1.4-in/3.5-cm activation surface, the Specs switch is small enough to be worn, but is most often used as a mounted switch. The Specs switch includes a standard flange base, a space saving flush base and a strap base for mounting around items. 24-in/61-cm strap included.

100SPBK 100SPBL
100SPG 100SPR
100SPY
\$59

Big Red® **Best Seller**

The switch that started it all comes in a variety of colors! True to its name, the Big Red switch features a 5-in/12.7-cm activation area, making it the best choice for individuals with visual impairments and individuals with physical disabilities who require a larger target area. Includes red, yellow, blue, and green switch tops.

10033500 / \$59

Blue2™ Bluetooth Switch **New**

The Blue2 Bluetooth switch provides a sleek, modern design with new features that make it compatible with all switch accessible apps and iOS Switch Control. Includes rechargeable battery.

Also compatible with Mac OS X, Windows, Android, and Chrome devices with a Bluetooth connection.

10000017 / \$179

Mini Beamer™ Transmitter and Receiver **New**

The new Mini Beamer Transmitter and Receiver comes with a modern look, small form factor, and rechargeable battery. The transmitter proximity sensor activates when a user is within .39-in/1-cm of it or with a light touch. The receiver has an LCD display and switch, latch, timed seconds, and timed minutes functionality.

The Four Classroom Activity Supports Every Classroom Must Have

PowerLink® 4 Control Unit * **Best Seller** *

Easily turn on and off two separate A/C electrical appliances with the PowerLink 4. Each appliance can be controlled with one wired switch or up to eight separate Big, Mini, or Jelly Beamer Wireless switches. Six unique modes of operation (Direct, Latch, Timed Seconds, Timed Minutes, Two-Switch, and Count) provide a variety of control options. Count mode allows for easy, precise data collection of activations and Two-Switch mode allows for collaborative activation for safety or cooperative use.

Classroom Activity Supports

Step-by-Step™ GamePlay

Incorporating the Step-by-Step GamePlay into game-based instructional lessons enables students to learn basic skills such as eye-hand coordination, as well as more complex skills such as problem solving. Learning through the use of games is not only highly motivating, but it encourages collaboration, offering another way for students to interact and communicate with each other. Along with fostering language and social skills, strategic thinking is developed as students are challenged, motivated, and engaged. Experiential learning promotes learning by doing, thus increasing students' role as active learners in the process of acquiring new skills and increasing their knowledge.

- > Level 1: Randomization - randomizes your message selections.
- > Level 2: Random Elimination - randomizes your message selections and once played, it is eliminated from the queue until all messages are played.
- > Level 3: Choice - allows an individual to skip through a series of messages to get to the desired message by activating the surface multiple times in a row.

Services

Assistive Technology Support Service

Build staff capacity and increase utilization of assistive technology

Assistive technology specialists from AbleNet can now work side-by-side with you and your team to help enhance your support and commitment to students using assistive technology to build a successful learning environment. Our team of experts have the ability to address student needs with products from well-known providers within the assistive technology industry. We understand meeting IDEA mandates in a dynamic environment of dedicated and quick-ready consumer devices can be a challenge – our team is here to support your service to these students.

Our year-long service commitment includes:

1. **Assessment** – An AbleNet professional will conduct the primary AT assessments or provide independent review of the AT assessment that has already been conducted by the school's assessment team.
2. **Loan Program** – AbleNet has invested in a large loan library in an effort to provide the widest array of options or considerations of devices to help ensure the right solution for each student needing AT support.
3. **Implementation** – Key to the year-long service success is the ongoing support for all educators working with the students who use AT. Our team of experts provides quick-ready answers and support woven throughout the day, week, month and year.

AbleNet has developed a hosted and secure Learning Management System that allows our team of AT professionals to plan, organize, document, and deliver all support services to your students who are benefiting from the service. This custom-built technology allows our team and your team of educators to be truly connected to maximize our support and commitment to each student's success.

Get Started Today!

AbleNet is only accepting a limited number of students in the program for the 2015-2016 school year. If you have a student or students that could use this support service, please call 800-322-0956 right away to schedule a webinar to learn more.

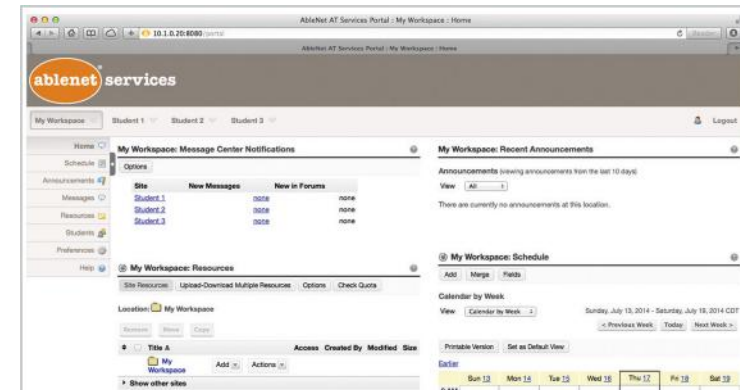

Hear what schools are saying!

We have received great feedback from the schools that have started to use AT Support Services from AbleNet! They are excited and feel that AT Support Services will help them tremendously to achieve their goals. See what one school is saying:

"We are eager to partner with AbleNet Support Services for Assistive Technology. This partnership will assist NSSEO in building capacity for our special education teams, provide best practices for acquisition of assistive technology tools with data-based decisions and improve implementation strategies and plans."

We often struggle with access issues for some students with complex motor impairments and look forward to collaborative problem solving from an outside consultant. This service will also provide access to an assistive technology loan library of equipment and guide implementation of these tools throughout the school year. We are confident that this partnership will assist us in improving outcomes for students."

Mary Ann McGinn, NSSEO Technology Coordinator &
Susan Mahoney, NSSEO Assistive Technology Coordinator

The online AbleNet Learning Management System stores documentation on each student in your district and is available for your team to access 24/7.

University

AbleNet University™ Professional Development

FREE Online Professional Development!

One of the most common issues raised by professionals is the lack of time to keep current with assistive technology solutions available today. Therefore, AbleNet is proud to offer **FREE** webinars dedicated to professional development that keep professionals up-to-date on emerging assistive technology and curricular solutions for the classroom, home, and community.

The goal of AbleNet University is to bring key leaders from around the globe in the field of assistive technology and curriculum to assist in improving professional skills. Many districts have found AbleNet University content so helpful, that they have approved it as continuing education credit within their district.

See what your peers are saying about AbleNet University webinars:

"I really appreciate the free webinar recordings online; they have been very helpful for helping myself and my classroom staff support students in the curriculum."

- Nicole S., Philadelphia, PA

"The addition of webinars has been very helpful to learn about new products and learn to use other products in new ways. Thanks for doing a great job supporting students with disabilities!" - Kathy V., Lake Elmo, MN

"A big thank you for the great customer service. I also want to thank you for the helpful accessibility webinars. They are outstanding. Bravo. Wild applause!" - Meladee M., Galt, CA

FREE Classroom Activities and Resources

For nearly 30-years, AbleNet has discovered amazing ways people from around the world use our products. We've taken this great insight and created the Remarkable Ideas series of classroom activities that provide alternative methods of access so that all students can participate. Below are a few of our favorite resources and Remarkable Ideas.

Action Dictionary

The Action Dictionary is a free eBook that provides you with hundreds of alternative ways for students to participate in the classroom and be active learners.

Hangman

Everyone loves a challenging game of hangman. Enjoy this accessible version of hangman with your students!

This activity addresses:

- › Spelling
- › Social skills
- › Choice making
- › Cause and effect
- › Alternative methods of access for each part of the activity

Calendar Activities

Calendars are used every day, no matter what age you are. Teach students the concepts of a calendar using this adapted activity.

This activity addresses:

- › Calendar concepts
- › Planning ahead
- › Personal responsibility
- › Reciprocal conversation
- › Alternative methods of access for each part of the activity

Caramel Apple Bites

This activity was a huge hit when we released it during the fall. Caramel apple bites are good any time of the year so we wanted to share it again!

This activity addresses:

- › Following directions
- › Functional cooking skills
- › Fine motor skills
- › Alternative methods of access for each part of the activity

Mystery Boxes

Students experience mystery items by putting their hands inside of a box to feel what is inside.

This activity addresses:

- › Critical thinking
- › Choice making
- › Sensory
- › Fine motor skills
- › Alternative methods of access for each part of the activity

Written by You

Show how everyone can become an author with this activity.

This activity addresses:

- › Creative writing
- › Social skills
- › Choice making
- › Cause and effect
- › Fine motor skills
- › Alternative methods of access for each part of the activity
